# Defi a:

---

Students do not learn mathematics well from lectures. They may follow the teacher's steps, but many will not be able to remember or or apply what they have seen. Students often cannot solve a problem that was just presented in lecture.

**MIT**  
**HAITI**

# Solisyon an:

---

Active learning allows students to practice what they are learning and allows teachers to more readily understand and address students' misconceptions about the material.

**MIT**  
**HAITI**

# Rezila a:

Students enjoy the class more, and learn the material more thoroughly.

MIT  
HAITI

Another benefit of an active classroom is that students and teachers form closer relationships
