

The MIT Mathlets in Haitian Kreyòl

Haynes Miller
Massachusetts Institute of Technology

PREZANTASYON NAN:
SENPOZYÒM MIT-AYITI

Defi a:

In teaching mathematics
you have a choice: either

-- give a general case
using formulas, or

-- give special cases as
examples.

To an expert, the general
formula *contains* the
special cases, but students
don't see it that way.

MIT
HAITI

Solisyon an:

Mathlets

- Konpayèl Anvan Kwazman
- Konvolousyon: Antipilasyon

Nan seksyon sa a n ap jwenn tout yon seri lojisyèl matematik ki rele “Mathlets” (oswa “Matlèt” an kreyòl). Se ak Java yo fèt. Lojisyèl sa yo ka sèvi lè moun ap aprann ekwasyon diferansyèl ak lòt konsèp nan matematik. Gen plizyè egzanp sou kouman nou ka zouti nimerik sa yo pou nou fè devwa, pou nou travay an gwoup oubyen pou nou prepare prezantasyon nan kèk kou, epi nou ka aprann teyori ki dèyè apwòch matematik sa yo. Nan seksyon sa a, n ap jwenn kèk videyo sou egzèsis ki gen esplikasyon vèbal ladan yo.

Nou ka itilize Matlèt yo an kreyòl dirèkteman sou sit sa a oswa nou ka telechaje yo sou òdinatè nou.
